NICOLA MARINELLI – Citizenship: Italian (EU)
Business Analyst | IT Project Manager | Data Migration/Analysis | AI Solution Architect
Brussels, Belgium | +39 3475180183 | nmarinelli2@gmail.com | https://nmar2.github.io/profile/

PROFESSIONAL SUMMARY

Results-driven Senior Business Analyst and Project Manager with 30+ years delivering complex digital transformation, regulatory compliance, crisis-management and cloud migration initiatives for EU Institutions, HSBC, IBM, and GE Oil & Gas. Currently on the European Commission's ECMP platform, covering business analysis, process configuration (Camunda/Compass Corporate) and technical documentation. 2+ years applied experience architecting and prototyping Generative AI solutions. Bridges business strategy with hands-on technical implementation, collaborating with engineering teams through model selection, RAG pipeline design, API orchestration. Ability to translate foggy stakeholder requirements into shipped, compliant solutions on time and within budget. Expert in Agile/Scrum, BPMN/UML, RESTful API design, integration patterns, middleware platforms, and data transformation techniques. IIBA® -AAC certified. Fluent English (C1).

CORE COMPETENCIES

Business Analysis: Requirements Elicitation, BRDs, User Stories, Acceptance Criteria, MoSCoW, Stakeholder & Change Management, Integration Impact Analysis, UML, BPMN
Project Management: Agile, Scrum, PM2, PMP Principles, Scope/Schedule/Budget Tracking, Vendor Coordination, Risk Management
Technical & Data: REST API Design, Data Modeling, Middleware Layers, Integration Patterns, Data Transformation Tooling (ETL, mapping engines, XSLT), Sequence Diagrams, Data Mapping (UML), Data Migration, Cloud migration strategies evaluation.
Workflow & Platform Configuration: Camunda BPMN workflows, Compass Corporate, JSON-based service configuration, Rules Engine, notification templates, Secunda++ security profiles/RBAC, CCM taxonomies
Software & API Engineering: Python, FastAPI, RESTful API Design, JSON/XML, LangChain/LangGraph (prototyping)
Security & Compliance: OAuth2, AWS IAM/Cognito, RBAC, PII Protection, Audit Logging, GDPR/EU Compliance, Content Filtering
Delivery & Governance: Agile/Scrum, Requirements Elicitation, Architecture Trade-offs (Accuracy/Latency/Cost), Vendor & Cross-Team Coordination, UAT & Quality Assurance
Tools & Frameworks: Jira, Confluence, ServiceNow, SharePoint, Balsamiq, MS Project, Clarity PPM, ARIS, Visio, Excel/VBA, Git/GitHub, IBM Maximo, SQL/PL-SQL, Power BI, JSON/XML, AWS Cloud Concepts, UAT Planning, Python

WORK EXPERIENCE

Business Technical Analyst | EU Commission DG DIGIT – ECMP (European Crisis Management Platform)
May 2026 – Present

- Business analysis, technical documentation and configuration for ECMP, the Commission's crisis management platform.
- Configured business processes on Camunda/Compass Corporate (BPMN, task-detail and document-list JSON configs); documented Datasets and Dataset Groups, Document List and CCM (Call and Code Management) taxonomies.
- Documented the access-rights model in Secunda++ (security profiles, scopes, AND/OR rights trees) and Rules Engine configurations.
- Defined the release-communication and bug-support tracking process with stakeholders; supported tender activities and coordination with architecture and test teams. *Tech: ECMP, Dynamic Forms, Camunda, BPMN, Compass Corporate, Secunda++, CCM, JSON, Jira, Confluence, GitLab*.

Business Analyst (Contract) | EU Commission DG GROW – Single Digital Gateway/ Your Europe
May 2025 – February 2026

- Led BA for front-end and back-end enhancements serving 1,300+ active users across the EU Single Market.
- Resolved critical accessibility and data-interpretation gaps, improving regulations compliance and reducing support tickets.
- Defined REST API specs to orchestrate LLM calls, manage context windows, and implement fallback handling; documented architecture decisions for engineering review.
- Implemented AI observability patterns (logging, token tracking, latency monitoring) and established prompt versioning & evaluation frameworks to reduce hallucinations and improve response accuracy.

- Conducted AI-feasibility analysis; defined REST API specs, sequence diagrams and use cases (UML), and UI mockups (Balsamiq). *Tech: Jira, Confluence, SharePoint, UML, REST API, Balsamiq, AWS services, AI tools*.

Data Business Analyst (Contract) | EFSA – Data Outreach & MUST-B/ ApisRAM
May 2024 – January 2025

- Benchmarked 10+ data portals to establish UX, visualization, and accessibility standards adopted as organizational baseline.
- Designed KYC classification framework and produced BPMN data/process models used as direct development input.
- Designed hybrid retrieval architecture for chemical, environmental, and agricultural datasets, embedding vector search concepts alongside traditional ETL/mapping engines for structured/unstructured data fusion.
- Created the Solution design of a Python-based automation for data preprocessing, chunking strategies, and embedding pipelines; coordinated with dev teams to integrate middleware layers and API orchestration for AI-ready data delivery.
- Delivered end-to-end BA for ApisRAM portal, engineering integrated data architecture across chemical, environmental, and agricultural datasets; conducted integration impact analysis, architected middleware layers and middleware platforms, and defined data transformation tooling (for ex: ETL tools, mapping engines, XSLT, etc.). *Tech: Visio, Power BI, Vector/Relational DB concepts, Excel/VBA, AI tools, Confluence, SharePoint, Jira*.

Security Business Analyst (Contract) | EU Parliament – Security & Accreditation Systems
June 2023 – March 2024

- Authored BRDs and ARIS diagrams for 4 mission-critical systems: MEP management, watchlist security, parking, and social names.
- Designed REST API specifications (endpoints, auth protocols, request/response) and coordinated integration specs with third-party vendors; documented integration patterns, sequence diagrams and data mapping for accreditation features.
- Established baseline AI quality assurance and guardrail requirements (content filtering, access control, hallucination mitigation) prior to production deployment.
- Produced cloud-migration conceptual study with cost-benefit matrices and risk assessments. *Tech: ARIS, SQL, Power BI, Clarity PPM, Jira, Confluence, SharePoint, Excel/VB scripts*.

Business Analyst (Contract) | EU Commission DG MARE – Ocean Store/ IFDM Fleet/ SSF
May 2021 – April 2023

- Developed methodology and complexity-scoring criteria for AWS cloud-migration tender, assessing RTO/RPO and confidentiality for 12 apps.
- Delivered BRDs for IAM, Business Rules Engine, MDM, and Log Management; prioritized Jira backlogs via MoSCoW in Agile/Scrum. Designed ULM use cases, BPMN frameworks.
- Led BA for IFDM Fleet and SSF monitoring, enhancing FLUX/XML ingestion and designing GIS-integrated vessel tracking data models with data mapping and transformation logic. *Tech: AWS services, XML, ServiceNow, ARIS, Jira, Confluence, SharePoint, Excel/VBScripts, ETL/mapping logic*.

Business Analyst (Contract) | EEAS – Sentry IAM & e-DMS Pilot
October 2020 – May 2021

- Defined requirements, business rules, use cases, and change-impact docs for Sentry, the centralized auth backbone for all EEAS apps, modeling auth flows via sequence diagrams and active diagrams (UML).
- Created REST API specs (OAuth2/OIDC flows, security protocols) during core-feature refactoring, aligning with middleware layers and integration patterns.
- Cleared 10-year Jira backlog (1,200+ tickets) via automated Excel pivot dashboard, cutting manual tracking by ~20 hrs/week. *Tech: Jira, Confluence, SharePoint, Oracle DB, Python, Postman, Visio, Excel/VB Scripts*.

Project Manager | HSBC – Online Time Deposit & SWIFT Singapore
November 2019 – October 2020

- Managed end-to-end delivery of Online Time Deposit feature; coordinated distributed teams across UK, India, China, HK, SG, Canada.
- Facilitated bi-weekly Agile sprints, managed backlogs, tracked budget, and supervised change-request workflows.
- Ensured the Online Time Deposit onboarding journey complied with the bank's KYC standards (customer identification & verification, Customer Due Diligence, AML/sanctions screening, risk-based customer

classification), translating compliance requirements into business rules and acceptance criteria and coordinating sign-off with Compliance and cross-regional stakeholders.
- Delivered SWIFT Singapore project by normalizing MT94x/MT103 transactions for configurable global rollout, applying data transformation tooling and integration patterns for cross-system interoperability. *Tech: MS Project, Clarity, Jira, Confluence, SharePoint, Excel/VB Scripts*.

Project Manager & BA (Contract) | EU Council – EMMAM/ Budget DB/ CLS
October 2017 – August 2019
- Led full PM lifecycle (PM2+ Agile/Scrum) for EMMAM mobile app: scope, WBS, business case, vendor RFQ, risk strategy.
- Authored BRDs and as-is/to-be data models for Budget DB; created roadmaps and mapped third-system interface impacts using sequence diagrams and data mapping, coordinating integration specs with third-party vendors. Create BPMN and UML artifacts.
- Improved the legacy Budget application made in MS Access.
- Delivered weekly executive dashboards tracking risks, issues, completion metrics, and resource utilization to C-level stakeholders. *Tech: ARIS, Oracle DB, ServiceNow, MS Access, Jira, Confluence, SharePoint*.

Project Manager | IBM – Michelin BlueCare/ ABN AMRO (Multiple Projects)
September 2012 – September 2017
- Directed global Tivoli Monitoring migration for Michelin, managing BPR alongside technical rollout within cost/ time tolerances.
- Managed bank IT migration to IBM SoftLayer cloud for ABN AMRO; controlled scope, schedule, cost, quality; secured customer sign-offs.
- Served as Scrum PM for security-deviation remediation; produced weekly dashboards classifying 100+ issues by tech/geo team. *Tech: MS Project, Maximo, Kanban, Excel/VB Scripts, Jira, Confluence, SharePoint*.

Project Manager (Contract) | GE Oil & Gas – MDR (Manufacturing Detail Report)
June 2011 – June 2012
- Managed ERP delivery for quality-test documentation on industrial machinery, overseeing Java frontend and PL/SQL backend.
- Analyzed requirements, produced functional specs/UI mockups, defined UAT criteria, and managed offshore teams. *Tech: MS Project, Oracle DB, PL/SQL, Six Sigma, Clarity, Excel/VB Scripts*.

Earlier Experience (1992–2011): Senior Software Engineer/ Technical Consultant / Business Analyst at Cap Gemini, Vodafone, Telecom Italia, SchlumbergerSema, Credit Suisse, Portal Software, Orga Systems, ConAct, Tecnomen. Focus: Telco billing/ mediation, CRM, financial risk systems, OSS/BSS, real-time platforms. (Details available upon request.)

EDUCATION & CERTIFICATIONS

- Master in Computer Science | University of Bari, Italy | 1984–1990
- Master in Company Management | University La Sapienza & Assoc. Esplorare, Italy | 2005–2006
- Certifications: IIBA®-AAC (Agile Analysis) | IBM Experienced PM | ITIL® Foundation | Scrum Fundamentals (SFC™) | Six Sigma Yellow Belt | Stanford Customer Relationship | AI Productivity & Python Dev (Coursiv / freeCodeCamp)

LANGUAGES

- Italian: Native | English: C1 Proficient (EFSET Certified) | French: B1 Intermediate

References and certification badges available upon request.
